██████████ called this afternoon and confirmed that the films on Johnson's visit to Australia and another Australian film would be available for showing Tuesday morning (29 Nov.), 1030-1130. As I mentioned to you this morning, the film of Johnson's visit to Australia covers about 27 minutes and there are many fine views of Canberra, Melbourne, and Sidney. The other film is an excellent introduction to Australia and it shows a full range of activity down under.
